Test Coordination is the premier online platform to manage your Track Occupancy Schedules and Infra Capacity control, Test Organization and Test Resources Management, Export and Publication features. It allow test managers and test teams to control test campaigns and to reduce overhead, delays and cost.

**Getting started**

The Test Coordination website can be accessed by visiting: www.testcoordination.com

You can login providing your username and password in the login box. Once you have been authenticated, you can select the following items:

- Track Occupancy Schedules (TOS)
- Test Resources Management (TTO)
- Reporting - overviews and export of TOS and TTO
- Manage - project management area

**More information**

If you are interested in using the application or want to know more about its rich features, you can send us an email: info@testcoordination.com.

The Test Coordination application is an initiative by Efios Rail
